Dosage and Administration

To ensure safe and effective use of Adipex, it is essential to follow the recommended dosage and administration guidelines. The typical dosage of Adipex is 15-30 mg per day, taken orally in the morning, 1-2 hours after breakfast. It is crucial to consult with a healthcare professional to determine the best dosage for your individual needs.

Here are some general guidelines to keep in mind:

- Adults: 15-30 mg per day
- Children: Not recommended for children under 16 years old
- Elderly: Use with caution, as Adipex may interact with other medications

It is essential to take Adipex as directed, without crushing, chewing, or breaking the tablets. Additionally, do not exceed the recommended dosage, as this can increase the risk of adverse effects.
